October 19, 2016

Dear Douglas Primary School Community,

Our school system is committed to protecting student, teacher, and staff health. To protect our school community, the Douglas Public Schools tested our drinking water for lead in each of our schools. We have received the results for Douglas Primary School.

Of the 122 samples taken at the primary school eight (8) initial samples tested above the 0.015 mg/l mark. All of the flush, or second samples, tested below the mark. All eight (8) of those water sources were immediately closed and we are working on identifying and correcting the problem.

Again, all eight (8) water sources were immediately closed to use.

The Kitchen, the restrooms, all homerooms, the hallway water fountains, and all other sources of drinking water are all clear.

You can see a copy of the school's water testing results in the District central office, at the Middle School, which is open from 8:00 AM – 3:30 PM and on our District web-site, www.douglasps.net,

For information about water quality and sampling for lead at home, contact the Massachusetts Department of Environmental Protection (DEP) or enter the following link into your web browser: <http://www.mass.gov/eea/agencies/massdep/water/drinking/is-there-lead-in-my-tap-water.html>.

Sincerely,

Norman P. Yvon
Superintendent of Schools

Cindy Socha
Principal Douglas Primary School

Excellence in Education

The results (column J) are reported in mg/l or parts per million. The action level for lead is any result greater than U.U.I's mg/l. The action level for

concrete any result greater than 1.3 mg/l "ND" stands for non-detect. The contaminant was not detected above the MDL
